G's Secret Lair
Explained

_____

Homepage
gagala.org

The homepage includes
public to access for free:

- Terms and conditions of entering
- Link to the Lair's main page
- Shortcuts to the main Lair folders (KP, Harmless, Comix, PhillipThe2, Others)
- Link to ZIP downloads (All files of the main Lair folders to download)
- Link to the G-log (Weblog with news and information)
- Link to GAGALAND (Landscape & Nature Photography in 4k)
- Links to supporting sites (Where you can support G and receive the passwords for the **special folders**)
- Link to history of Lair v1 (2008-2016)
- Link to history of Lair v2 (since Sept. 2016)

Access for supporters only:

Links to the **special folders** that are password protected. Passwords are available at the supporting sites. Password renewal begins at the beginning of a new month.

- 2k (Silver)

Includes information PDF files, a few videos and new works in 2k format (mostly 1920x1080p or 1920x3070p) in high quality WebP format. At the earliest one month later these works appear in the Secret Lair as JPEG files for free public access.

- 4k (Gold)

Includes new works in 4k format (mostly 3840x2160p or 2880x4605p) in high quality WebP format. Gold supporters also have access to the 2k folder.

- 8k (Platinum)

Includes new works in 8k format (mostly 7680x4320p or 3840x6140p) in high quality WebP format. Platinum supporters also have access to the 2k and 4k folders.

The special folders are currently only available as a list of files and do not contain a complete high quality copy of the public files, because until now no easy to use and good web gallery application could be found that includes all the necessary needs, such as good user

management and providing the file types JPEG, PNG, GIF, WebP, PDF, 7-Zip and WebM. As soon as an update of an application provides all this, the special folders will look better and be easier to access. Currently a Platinum member has to use three passwords to access all three special folders, with good user management he would only need one.

———————————

Secret Lair

The current version of Secret Lair (v2.4) is a web gallery of ZenPhoto (1.6). Thumbnails other than JPEG, PNG and GIF cannot be displayed in this version. That's why there are no folders for supporters, which show new works with thumbnails instead of a list, because most of them are in WebP format. There are the following main folders:

- KP & Co. (Kim Possible and friends, for adults only)
- Others (Toons from other series, for adults only)
- Harmless (Mixed SFW stuff)
- GAGALAND (Landscape & Nature Photography in 4k)

Some folders contain subfolders, and some are called 'work files'. A work file is a graphic file of a toon used for a comic, with either a simple or no background, usually larger than used in the comic, often without clothing.

Works are sorted differently depending on their content. A correct sorting by creation date is no longer possible, because there were many versions of the Secret Lair and the files were copied many times, and through these copying processes the files often got a new creation date. The result is that some 'new' files are actually 'old'. There have been other web galleries tested, some offered a row of thumbnails with a 'currently added' tag, but they had other weaknesses. For now, the lair is ZenPhoto 1.6, waiting for an overdue update or another, better web gallery.

———————————

If you like Gagala's work and would like to support him, you can choose any of the support sites where he can be found and make his life a little better. There you will find the actual passwords for the special folders.

Commissioned work cannot be done due to the long running comic stories, which will hopefully come to a happy ending one day.
